In 2021, Sunway University made a landmark decision to offer a module on sustainability to all its students and training staff. Meanwhile, the Malaysian government has launched the 10-10 MySTIE framework and the Shared Prosperity Vision 2030 to support the future of its cities and towns. These initiatives point to the need to rethink how we should link education and cities.

The ASEAN Education Cities Conference 2023 focuses on the way cities function as spaces for education, but also how educational institutions can support the sustainable development of cities and communities, through research, teaching, policy advising and public engagement.

The AECC 2023 will serve as a platform for researchers and scholars from academic, industry, organisations and other stakeholders, to share their ideas, best practices or research findings on smart and sustainable cities, and to work together towards developing and exploring new ways of educating the next generations of planetary-health caretakers.

**SPEAKERS**

**Datuk Patinggi Tan Sri (Dr) Abang Haji Abdul Rahman Zohari Bin Tun Datuk Abang Haji Openg**
